DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-7, drawn to sustained-release preparations prepared from double granules.

Group II, claims 1 and 8-11, drawn to sustained-release preparations prepared from double granules and containing a coat layer.

Group III, claims 12 and 13 drawn to a method of preparing a sustained-release preparation.

The inventions listed as Groups I-III do not relate to a single general inventive Concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reason: the common technical feature in all groups is a sustained-release preparation prepared from double granules. Kristensen, et. al. (U.S. Patent No. 5,807,583) teach a sustained-release preparation prepared from multiple granules (see col. 2, lines 55-63).

Applicant is advised that in order for the reply to this requirement to be complete, it must include an election of the invention to be examined even if the requirement is traversed (37 CFR 1.143).
